DHARMVEER KUMAR

Software Engineer / Frontend & Mobile

github.com/dharmvir73

ABOUT

A software engineer with a curious mind and a builder’s instinct. I enjoy turning complicated ideas into clear, useful experiences, and working at the intersection of product thinking, interface design, and engineering.

PERSONAL JOURNEY

2017: Completed school. An interest in computers and technology grew into a desire to understand and build.

College: Explored programming, frontend development, and the connection between code and human experience.

2023: Began my professional software engineering career.

Today: Developing my craft across frontend and mobile, while exploring AI, accessibility, and interaction design.

TOOLKIT

Interfaces: React, TypeScript, JavaScript
Mobile: React Native, Android, iOS
Connections: Node.js, REST APIs, WebSockets
Additional technologies: Firebase, MongoDB, Docker, AWS, Git

WHAT I CARE ABOUT

Clear interfaces. Reliable behavior. Accessible experiences. Thoughtful details. A willingness to keep learning.

This is a public personal profile, not a record of employer or client projects. Company products, internal processes, architectures, and operational details are intentionally excluded.
